MMAST

Delivering Global Training to Medical and Combat Teams

The U.S. Army Program Executive Office - Simulation, Training, and Instrumentation (PEO-STRI) expanded its Air Force Medical Modeling and Simulation Training (AFMMAST) contract with ECS to incorporate Navy Graduate Medical Education training as the Medical Modeling and Simulation Training (MMAST) program. Under this global training services contract, our team of experts provided support to the Air Force Medical Service (AFMS) and the Navy Medicine Education, Training and Logistics Command (now the Navy Medical Forces Support Command) from their co-located Central Program Office in San Antonio, Texas.

ECS developed advanced learning technologies to improve medical education and training for healthcare teams and patients to integrate the training needs of the U.S. Navy. Our experienced program management team managed contractor support at more than 46 Simulation Centers and Medical Treatment Facilities within the continental U.S. and outside of the continental U.S. (CONUS/OCONUS).
